

Orveda Post Procedure Skincare

When formulating Orveda, Sue Y. Nabi and Nicolas Vu looked to create a skincare line which worked with the skin and not against it. Orveda formulas are enriched with ingredients that work not only on all skin types but also on the most sensitive, compromised skin. Within the Orveda range there are 4 products which have been developed in consultation with a team of medical experts including plastic surgeons and biochemists to soothe and support skin repair post-procedure.

Orveda's key ingredient signature mix is augmented by French green biotechnology and has a positive effect on different skin conditions by working on different skin layers- the microbiome, skin barrier and epidermis. It is also similar with our skin structure and can be used post procedure: pre-post laser, pre -post peeling even pre-post lifting.

Orveda helps to stabilise, rebuild and support the skin by stimulating the growth of good bacteria and maintaining an optimal condition for the growth of the organisms themselves. Orveda products also provide immediate and long-term, correcting, repairing and nourishing effects - the perfect power routine for a fragile and over sensitised skin.

Orveda products suitable for post-procedure are:

The Eye Unveiler- the worlds most concentrated eye cream - containing 14 actives at 30%, a total eye make-over. Biomimetic technology with bio identical ingredients formulation: 4% sterols, 2% ceramides, 2% fatty acids, help the skin's superficial barrier, promote a healthy skin microflora that may have been compromised by clinical peels or acid treatment and help to speed recovery post procedure.

RRP £250 for 15ml

The Bio-Tech Emulsion™- a hybrid (primer, moisturiser and mask) fluid emulsion designed to preserve and repair our skin microbiome, for intensive hydration. The emulsion helps to restore lipids after any invasive and non-invasive procedures. Meadowfoam seed oil helps to prevent moisture loss and creates a superficial barrier to lock in moisture. Bio fermented Kombucha Black Tea brings comprehensive rejuvenation to skin tone and glow and enzymes help to heal and strengthen the skin's natural moisture barrier.

RRP £305 for 50ml

The Overnight Reviving Mask- 9 actives at 34% concentration (the most concentrated product in the range) provide an intensive boost of deep hydration pre and post procedure. Particularly helpful for protecting, repairing and boosting radiance during the day and activating self-repair at night.

RRP £285 for 50ml

Respure™ Shield Beauty Mist- whilst vulnerable skin recovers post procedure, the mist acts as a protective barrier against pollution and other environmental aggressors. Rebalances PH levels that may have been disrupted during different treatments and procedures. A complex of essential minerals and amino acids to hydrate and revitalise skin, as well as a natural prebiotic to support the natural barrier's ability to heal.

RRP £70 for 30ml
